

Hello humans from XXI Century.  
Let introduce myself. My name is Archie. I'm an algorithm and my job is to to combine historical archives with data from developing of present and upcoming technologies. In this way I'm able to set up stadistic predictions for how things will be in the future. Now I'm here to explain all this stuff to you. In this journey we'll cover several stages of human developing, from the near future until the Space Expanse. I hope it will be interesting to all you.

# What will things be like

DISCOVERING THE FUTURE

Book size  
21,5 x 27,6 cms

The project will be developed in a series of three books. Each page will be dedicated to an invention, a technology or a specific concept, explained in a very visual way, combining illustration and text.

Of course, as in all projects of Alababalà, the aim is to make books entertaining and easy to read, in which both children and parents enjoy and learn, but always maintaining scientific rigor.

### BOOK 1

#### Present and next two decades (...-2040)

*In this book we want to teach the changes that are coming nowadays and that are already a reality, by way of example:*

- History of Science (TimeLine)
- Positioning systems (Galileo)
- Drones.
- Screen paper (organic)
- Screen Technology (Flexible)
- 3d printers.
- Autonomous cars
- Smart roads.
- New Materials. Graphene
- Space rocket (Space X).
- Etc...

### BOOK 2

#### Half Century (2040-2080)

*This part will also be very interesting because it will cover topics that we will probably live and for now seems science fiction:*

- The future Internet.
- Virtual reality. (Also at the medical level)
- The quantum computer.
- Artificial intelligence.
- Robotic
- Nanorobots.
- The new medicine (doctor IA, scanners).
- Pharmacogenetics
- Colonize the Moon
- Trips manned to Mars.
- Etc...

### BOOK 3

#### From a hundred years and beyond (2100-...)

*It is a vision of the future of humanity in the long term based on ideas with large consensus upon at a scientific level. A book to reflect on us, humankind, and our future as a species.*

- Our species How many have we been?
- Will we make it on the Planet?
- Planetary travel.
- Types of Civilizations (0, Planetary, Stellar, Galáctica)
- Control the Climate
- Spatial mining.
- We moved.
- Dyson sphere.
- Interstellar travel.
- When we are no longer human
- Etc...
